Behind the Shelter Doors

How do shelter outcomes differ for dogs and cats across Australia's RSPCA network?

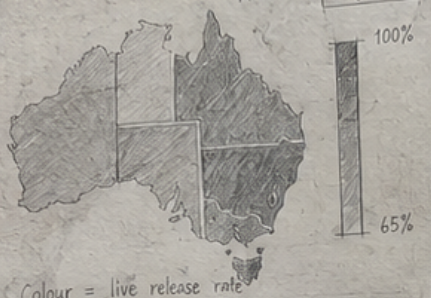

01 Geography 02 Outcomes
03 Changes 04 Beyond

1 GEOGRAPHY

Begin with outcomes, scale and selected facility locations.

1. Live-release rate (Choropleth map)

Animal: Dogs

Colour = live release rate

2. Number of animals recorded (Proportional symbol map)

Caseload: Dogs + cats

Animals recorded (circle area)

14,000
8,000
2,000

3. Selected RSPCA facility locations (Point map)

- Shelter
- Animal care centre
- Adoption centre

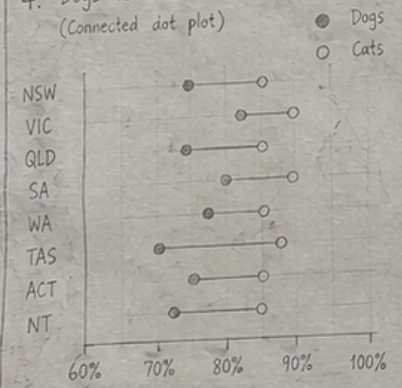

18 verified examples

Selected sites, not all shelters.

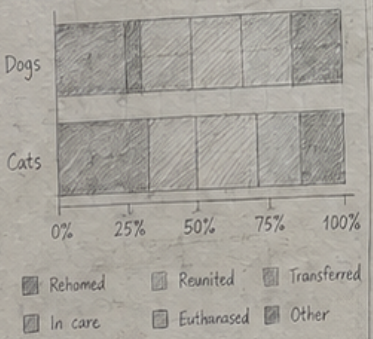

2 OUTCOMES

Compare the recorded outcomes of dogs and cats, beyond one overall release rate.

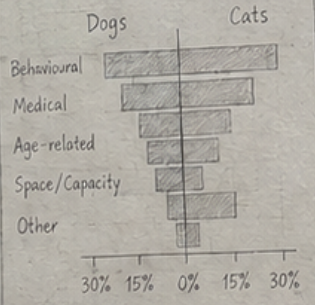

4. Dogs vs Cats live-release rates (Connected dot plot)

5. Outcome composition (100% stacked bar chart)

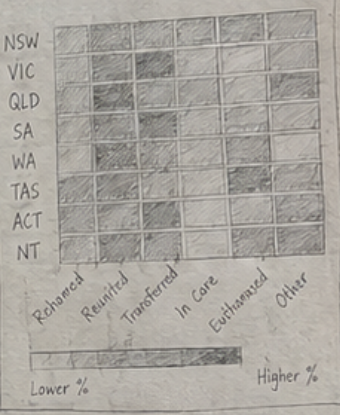

6. Euthanasia reasons (Butterfly chart)

7. Jurisdiction × Outcome (Heatmap)

Animal: Dogs

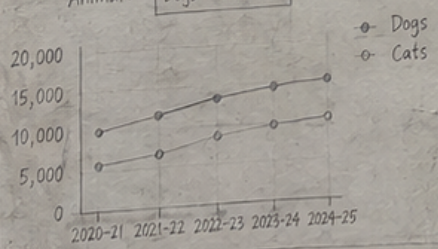

3 CHANGES

Explore how outcomes and rankings changed over time.

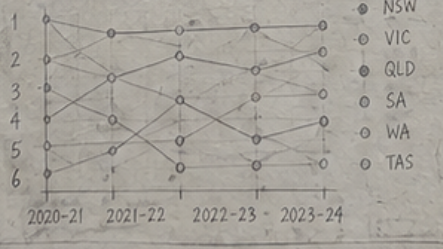

8. Reported caseloads over time (Line chart)

Animal: Dogs + cats

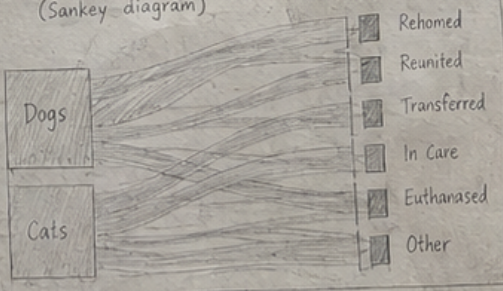

9. Year-on-year caseload change (Bump chart)

Ranking of annual % change (not welfare performance).

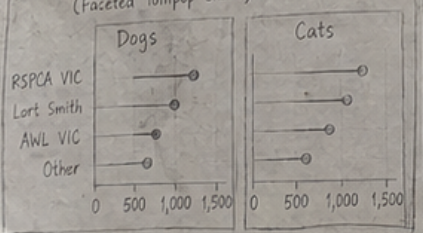

10. Species to outcome counts (Sankey diagram)

4 BEYOND THE SHELTER

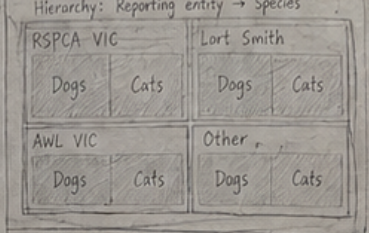

Learn from foster care, species composition, intake sources and seasonal patterns.

11. Victorian foster placements (Faceted lollipop chart)

12. Foster placement concentration (Nested treemap)

Hierarchy: Reporting entity → Species

13. Changing cat share (Slopegraph)

14. Townsville monthly patterns (Streamgraph)

5-year average, one centre
